OBJECTIVE:

Looking for Position in Software Company to utilize my strong technical expertise and academic training to work on innovative and challenging projects that contribute to the company's vision of creating cutting-edge solutions.

EXPERIENCE

Worked as Web Development & Designing intern

The Spark Foundation

- Worked as an intern in Graduate Rotational Internship Program (GRIP) in The Spark Foundation
- Developed a Basic Banking web App, enabling seamless transactions between up to 10 users. The app featured a streamlined user interface, allowing users to view customer profiles, initiate money transfers, and track transaction history. The project emphasized simplicity, omitting login and customer creation functionalities, and focused solely on facilitating direct transfers between existing customers.
- Built with HTML, CSS, and JavaScript, the Basic Banking App utilized Bootstrap to enhance UI designs and ensure a smooth user experience, allowing for seamless navigation and interaction.

PROJECTS

Weather API

- Created a Weather API project using **html, CSS, JavaScript**, integrating **APIs** to display real-time weather data with a user-friendly interface, demonstrating proficiency in API integration, data visualization, and front-end development.

Password Generator

- Created a Password Generator web app using **React**, empowering users to generate strong and secure passwords.
- User-friendly interface with options to customize password length, and character types (uppercase, lowercase, numbers, special characters).
- Implemented **React components** for efficient code structure, ensuring scalability and maintainability.
- Responsive design for accessibility across devices, optimizing user experience.

Shopping Cart App

- Designed a Frontend web application using **React.js and Tailwind CSS** to create shopping cart app.
- Created the add to cart and remove from cart functionality using **React Redux** for global state maintenance of different item.
